

Certificate of Inspection

PIPA Device Reference Number: **55903** | Tag Number: **55903** | Report: **416874-v1**

Pass

I confirm that this inflatable slide device has been inspected in accordance with the PIPA scheme rules, and where it is applicable, it meets the requirements of BS EN 14960. All details contained within this inspection report are a true representation of what I found and observed during my inspection process.

Inspection Valid From:

17 March 2025

Expiry Date:

16 March 2026

Inspector Name:

Peter Grand

Inspection Body:

Inflatable Testing & Training Services

Inspection Report ID:

416874-v1

Signature:

Peter Grand

Device Details

Manufacturer:

Airquee Ltd

Device Type:

Slide

Manufactured Date:

Unknown

Device Description:

Device Disclaimer:

I confirm that this inflatable slide device has been inspected in accordance with the PIPA scheme rules, and where it is applicable, it meets the requirements of BS EN 14960. All details contained within this inspection report are a true representation of what I found and observed during my inspection process.

Dimensions (L x W x H):

6.1m x 4.35m x 4.3m

Tested for Indoor Use Only?

No

Inspection Report 416874-v1

ID: 416874-v1

Inspection Valid from: 17 March 2025

Expiry Date: 16 March 2026

Status: **Pass**

Inspection Body: Inflatable Testing & Training Services

Tag No: 55903

Device Type: Slide

Serial Number: P53875

Item	Status / Details	Notes
Report Details		

This is an inspection of an inflatable device which has been completed under the scheme rules of the PIPA Testing Scheme Limited.

Creation Date:	17/03/2025
Inspection Date:	17/03/2025
Place of Inspection:	East Horsley
Inspector:	20: Peter Grand
Structure version:	202407
Tested for Indoor Use Only:	No

Device

Information about the device can be found below.

PIPA Reference Number:	55903
Tag Number:	55903
Type:	Slide
Name:	10ft Platform Slide Party
Manufacturer:	Airquee Ltd
Serial Number:	P53875
Date Manufactured:	Unknown
Device Images:	

Where is the device information or label?:

Side/front/inflation tube

Structure

This section of the report contains important structural information about your device. How a device has been designed and structured is a very important part of device safety.

Length:	6.1m	
Width:	4.35m	
Height:	4.3m	
Bed Panel Width:	0.45m	
Trough Depth:	Pass	0.06m
Seam Security:	Pass	No issues
The size of the stitching is between 3mm and 8mm:	Pass	4-5mm
Internal wall Heights:	Pass	1.3m
Are the walls able to contain the intended users?:	Pass	
Open Side Fall off Height:	Pass	0.6m
Grounding:	Pass	85kg
Stability:	Pass	No issues
Entrapment:	Pass	No issues
Sharp Angles or Hard Surfaces:	Pass	No issues
Number of Zips:	Pass	2 Enclosed - No issues
Window Integrity:		
Are Nets Present?:	No	
Are clamber nets present?:	No	
Air Loss Points:	Pass	No issues

Structure

Markings:	Pass	
Type of Artwork:	Pass	Printed

Materials

This covers the materials your device has been made from. Although the structure won't change over time the condition of materials will due to wear and tear and exposure to users and the elements.

Fabric Material and Condition:	Pass	Manufacturer - No issues
Thread Condition:	Pass	No issues
Material Fire Retardancy:	Pass	Manufacturer - No issues
De-lamination of PVC:	Pass	No issues

Anchorage

A vital part of safe inflatable device operation is appropriate anchoring – especially when devices are used outdoors.

Number of high level anchors:	4	
Calculated Required No. of Anchor Points:	10	
Total No. of Anchor Points:	Pass	14
Anchor Point Integrity, Location and Angle:	Pass	
Anchor Point Accessories:	Pass	
Anchor Description:	Pass	Triangle PVC
Are Ropes Present:	No	

Area & surround

Play Area m²:	4m²	
---------------	-----	--

Blowers

By definition inflatable devices covered by the PIPA Testing Scheme will use blowers. Blowers are fundamental to the operation of the device and will be checked both mechanically and electrically by your inspector. Note that is common for blowers to be moved between devices as, in many cases, it's not possible to always ensure a specific blower will always be used with a specific device. If blowers are swapped or replaced, they must be of the same design and power as used when the device was inspected.

Air Pressure:	Pass	1.32kPa	2024 = 1.14kPa
---------------	------	---------	----------------

Number of Blowers: 1

PAT Test - Is there a valid PAT test result within the past 12 months?:

Date of PAT Test:

CE/UKCA Mark: Pass

Inspection of the blower's inlet guard, outlet guard, non-return valve and impeller: Pass No issues

Blower Electrical Cable: Pass No issues

Blower Manufacturer: Gibbons Constant air

Blower Model Reference: Picture

Blower Serial Number: ZM125510C

Blower Power / Size: 1.5hp

Blower Distance: Pass 1.3m

Entrance, exits & evacuation

The entrance or exit of an inflatable is important to ensure safe access and evacuation. It also has design features to help reduce the risks to users on the device.

Evacuation Time: Pass 14Seconds

Entrance, exits & evacuation

Is the device considered to be an enclosed unit?: No

Does the device have a step?: No

Slides

Slides are a particularly fun feature of an inflatable device and there are critical dimensions required to ensure safe operation.

Number of Slides: 1

Platform Height: 2.89m

Platform Wall Height: Pass 1.47m

First Meter Wall Height: Pass 0.92m

Slide Wall Height: Pass 0.92m

Slide Sheet: Pass No issues

Run Out: Pass 1.7m

Platform Roof Fitted: Pass

Is the method of access to the slide using foam steps?: Yes

Users

Understanding the height and number of users is vital to safe operation of an inflatable device. This should have been specified by the device manufacturer, but the inspector will check the manufacturers recommendations based on device dimensions and appropriate standards.

Max Number of Users of Height up to 1.0m: 4 Manufacturer

Max Number of Users of Height up to 1.2m: 4 Manufacturer

Max Number of Users of Height up to 1.5m: 4 Manufacturer

Max Number of Users of Height up to 1.8m: 4 Manufacturer

Custom Max User Height:

Notes

These are final notes sections for the relate to the report and are particularly important to pay attention to if present. Risk Assessments contain important operational information that must be noted and acted on to ensure safe play. Your inspector may also provide other Advisory Notes related to maintenance or operation over the next 12 months

Additional Notes: Maximum operating wind speed outdoors - 24mph. - All anchor points to be used outdoors using ground stakes minimum size 16mm x 380mm or equivalent 163kgs per anchor point if setting up on hard surface. - Stakes should not protrude more than 25mm above ground level. - Minimum operating pressure 1kPa. - Mats to be used at entrance/exit when operating on hard surface. - Adult supervision always. - Manufacturers Operation manual must always be followed. - Pressure to be checked and recorded prior to each use.

Risk Assessment Notes:

Repairs needed to pass inspection:

Advisory items :

I confirm that this inflatable slide device has been inspected in accordance with the PIPA scheme rules, and where it is applicable, it meets the requirements of BS EN 14960. All details contained within this inspection report are a true representation of what I found and observed during my inspection process.
